## NOTES:

1. Values apply for each section of the dual amplifiers.
2. All types in any package style can be operated over the temperature range of -55 $^{\circ}C$  to 125 $^{\circ}C$ , although the published limits for certain electrical specification apply only over the temperature range of 0 $^{\circ}C$  to 70 $^{\circ}C$ .
3.  $\theta_{JA}$  is measured with the component mounted on an evaluation PC board in free air.
